MM33: HANDBAGS MADE OF VINTAGE SILK

MM33 is passion for quality and timeless accessories. It comes from a family of breadwinning women always wearing a smile and a silk scarf that matched perfectly their outfits, in good times and bad.

That same love inspires MM33's Carré on line: a collection of unique bags, in the medium-to-high end segment of the market. The collection is a luxycling project, which gives new life to vintage scarves.

MM33 turns iconic carré, selected in luxury second-hand stores, vintage boutiques and flea markets around the world, into models of bags that are full of life and unique - no Carré on can ever be the same as another.

Each bag, with its colors and prints, reinvents and transforms the past with its singular beauty.

Throughout the collection, MM33 combines the softness of silk with the quality of lambskin, giving the bag great adaptability to feminine shapes and, at the same time, refinement and elegance. The foulard adds character to the bag, and quilting gives silk body and structure.

The bag is featured with an internal compartment, organized with a zippered divider, a front and a back pocket. The chain is adjustable, allowing for shoulder or crossbody fit.

MM33 cares about sustainability: in addition to the luxycling of vintage scarves, we use bio-based materials and a GRS-certified recycled polyester padding.

All bags are entirely crafted in Italy.
