

M I L A N O

#MM33MILANO

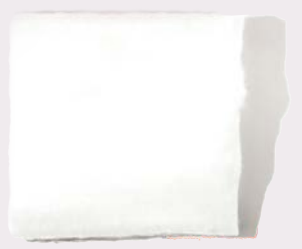

**MM33** IS A PROJECT OF **LUXYCLING** THAT BRINGS  
VINTAGE SCARVES TO NEW LIFE.

EVERY SILK SCARF WAS CAREFULLY SELECTED  
IN LUXURY SECOND-HAND SHOPS AND FLEA MARKETS  
AROUND THE WORLD TO BECOME ONE OF A KIND,  
UNIQUE BAGS: THE **CARRÈ ON**.

JUST LIKE OUR CUSTOMERS, THERE WILL NEVER  
BE TWO **CARRÈ ON** ALIKE.

#CARRÉON

THE ELEGANCE OF QUILTED SILK  
IS COMBINED WITH SOFT ITALIAN LAMBSKIN  
AND BOLD HARDWARE DETAILS.

#LUXYCLING

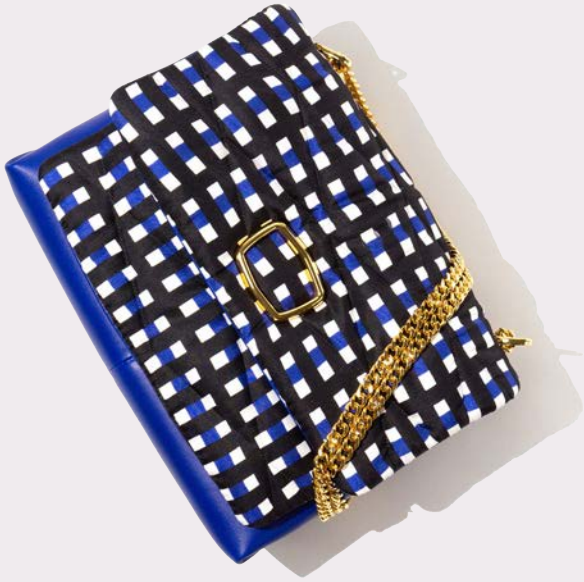

THE METAL FINISHING IS AVAILABLE  
IN THREE OPTIONS: WARM GOLD, SHARP PALLADIUM  
AND SWAROVSKI CRYSTALS.

THE **CARRÈ ON** HAS AN AMPLE MAIN COMPARTMENT,  
A ZIPPERED DIVIDER, A FRONT AND A REAR POCKET.  
THE CHAIN IS ADJUSTABLE TO ALLOW FOR  
A SHOULDER OR CROSS BODY FIT.

EACH **CARRÉ ON** COMES IN A PERSONALIZED GIFT BOX,  
INCLUDING A DUST BAG TO PROTECT THE PURSE,  
A PRODUCT CARE TAG AND A THANK YOU NOTE.

#SUSTAINABILITY

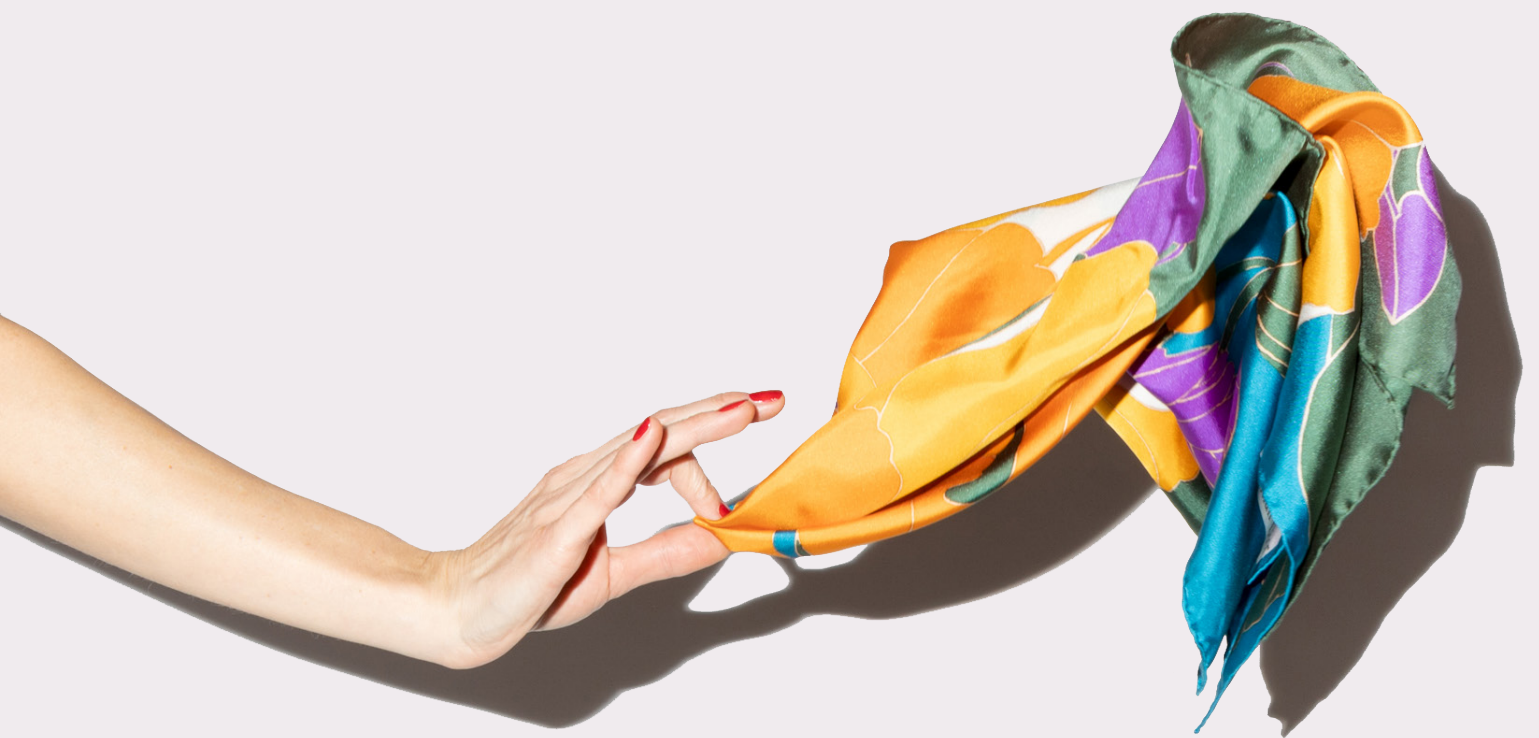

**MM33 CARES ABOUT THE ENVIRONMENT  
AND SUSTAINABILITY. WE SELECT MATERIALS  
WITH CARE AND PRODUCTION IS ENTIRELY  
MADE IN ITALY**

EACH SCARF IS SANITIZED AND UNDERGOES  
A HYDRO-OIL REPELLENCY TREATMENT  
THAT HELPS KEEPING EACH PIECE CLEAN.  
THE PROCESS COMPLIES TO REACH, ZDHC  
AND OEKOTEX STANDARD 100 REGULATIONS.

BESIDE THE **LUXYCLING** OF VINTAGE SCARVES,  
WE STRIVE TO MINIMIZE THE USE OF PLASTICS.  
IN ADDITION TO SILK, WE USE A COTTON CANVAS  
FOR LINING AND DUST BAGS.

RAWHIDES ARE A BYPRODUCT  
OF THE FOOD SUPPLY CHAIN  
AND THE TANNERY IS REGULARLY  
MONITORING THAT ITS LEATHER  
COMPLIES TO EUROPEAN REACH REGULATIONS.

THE PRODUCTION PLANT IS PROVIDED  
WITH SOLAR PANELS AND CHEMICAL ECONIMIZERS  
TO MINIMIZE USELESS WASTE.  
A WATER RECYCLING SYSTEM IS ALSO IN PLACE.

THE TANNERY HAS ALSO BEEN CERTIFIED TOWARDS  
THE ENVIRONMENTAL MANAGEMENT SYSTEM

**UNI EN ISO 14001:2015**

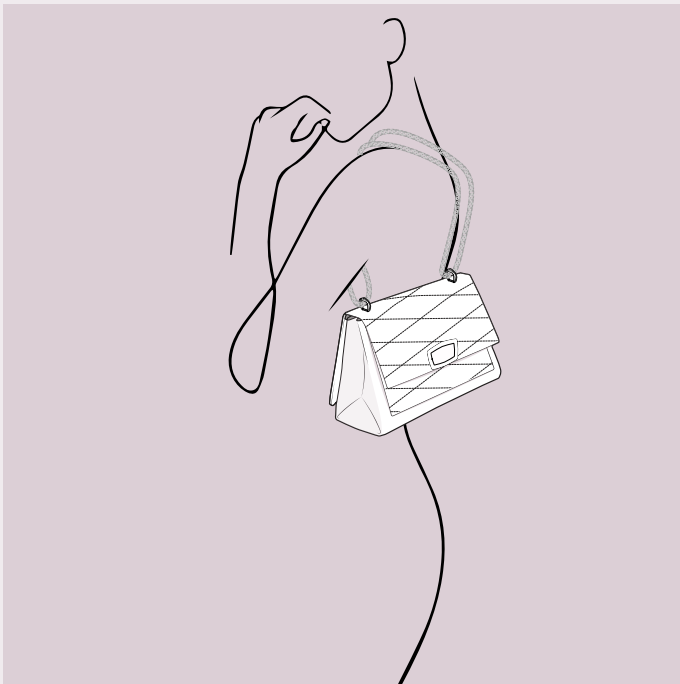

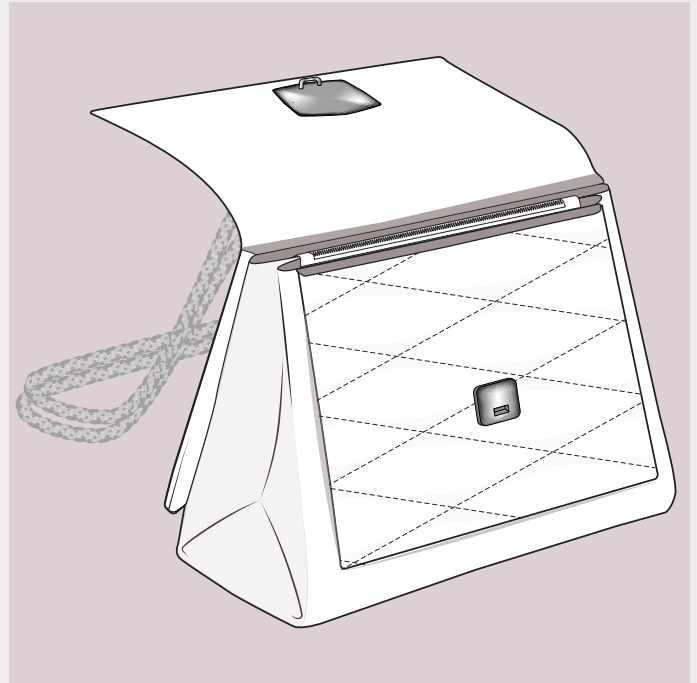

AND THE OCCUPATIONAL HEALTH  
AND SAFETY MANAGEMENT SYSTEMS

**UNI ISO 45001:2018**

EVERY **CARRÉ ON** PURCHASED MEANS THERE  
IS ONE PLASTIC BOTTLE LESS IN THE OCEAN!  
THE TECHNICAL MATERIALS OF THE BAGS  
ARE MADE OF RECYCLED POLYESTER AND PLA,  
THE POLYLACTIC ACID DERIVED FROM CORN FIBERS.

## TECH SPEC

### DIMENSIONS
