CMG DEDICATED GRANULATORS

On the occasion of the international Blow Moulding Conference, from 29 November to 1 December 2022 in Brussels, CMG Granulators proposed the new series of recycling system solutions for application with blow molding machines, featuring a high degree of productivity, regrind quality, efficiency of operation and a very low TCO level.

The new series covers capacities starting from 20 kg/h all the way up to 1500 kg/h. The new range is composed of 11 granulator models, all purposely designed for grinding blow molded containers or bulky objects.

The new CMG series of grinding systems includes infeed conveyors, metal detectors, and enclosed feed chutes. The infeed conveyor is integral part of the system, not anymore an appendix or an auxiliary device, and is controlled by the granulator so to synchronize all operations in full.

All granulators operate in high-efficiency conditions, are all equipped with EISA premium-efficiency motors and can have AMP controls (Adaptive Motor Power). Regrind evacuation, dedusting and air filtration are all automatic and require no maintenance.

Energy utilization is 20 Wh/kg vs the 40 Wh/kg of conventional solutions.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
