EVER MORE COMPACT AND FLEXIBLE

The modular design of the SA-V line by ELBA for the production of pouches has been renewed with the aim of further increasing performance and meeting additional requirements such as higher technology levels, compact size, flexibility and visual assistance.

The technological level of the machine has been raised by equipping it with an integrated web server that allows the remote monitoring of the Key Performance Indicator (KPI) as well as energy consumption analyses. With regard to compactness, the machine's layout has been optimized to improve control and expand the operating width of the materials processed, thus ensuring a broader choice in terms of pouch shape.

Flexibility, a specific strength of ELBA's modular lines, has been also improved to ensure the production of a larger variety of pouches on the same machine. This allows higher output rates along with significant savings in terms of footprint, energy and costs. Finally, with regard to visual assistance, real-time control is now possible for adjusting the cutting parameters.

On top of all this, the new SA-V line has been designed for easier operation in every respect, from setup to maintenance, and also incorporates more efficient adjustment devices and less components. The latter have been developed to ensure maximum reliability in terms of throughput speed and pouch sealing quality as well as to minimize the machine's downtimes, which are now limited to the replacement of wear parts.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
