EXTRUSION OF PS/PP THERMOFORMING SHEETS FOR ELECTRONICS PACKAGING

AMUT has recently completed the testing of a new PS and PP sheet co-extrusion line to be delivered to a leading European processor of thermoformed technical trays for the packaging of electronic components.

With a nominal width of up to 1,200 mm and an operating width of up to 1,000 mm, the line can produce sheets at the rate of 800 kg per hour.

AMUT's technologically advanced solutions, suitable for a wide range of thermoplastic resins, includes extrusion lines for sheets, plates and multicellular panels with nominal widths from 400 to 3,300 mm and thicknesses from 150 microns to a few centimeters. The number of co-extruders is defined according to the specific needs of the processor and to the features of the finished product.

AMUT extrusion lines can produce thermoforming plates up to 9 layers and ensure production capacities of over 4,000 kg per hour.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
