IEMCA MAESTRO, BAR FEEDER FOR LARGE FORMAT - THE BUCCI INDUSTRIES GROUP CONSOLIDATES IN INDIA

The best for large-diameter bars

The Maestro range of bar feeders is the perfect choice **for bars up to 100 mm for lathes with fixed headstock**, ideal for those who are looking for very high performances and very high flexibility.

The Maestro range allows **retooling times to reduce** to almost zero and to **minimize bar changeover time** thanks to the patented lemca system with self-adjusting bushings, that adapt to the diameter of the processing bar without any need for the operator to perform manual operations or diameter setting on the human-machine interface system.

The Maestro range is available with **UP magazines (Lower Single Rack)** and **OAB (Open Access Bundle)** to increase the capacity on the bar feeder and to **maximize production autonomy**. **Iemca bar feeders** make it possible to meet the needs of an unattended production process, characterized by long and uninterrupted working cycles. Iemca solutions are capable of **meeting the production needs of the customer, adapting to the specifics of the working cycle, and ensuring full production continuity**.

Extreme flexibility and **ease of use** make this feeder indispensable **to maximize your productivity**.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
