## **DYNAMIC TOOL BALANCER**

Designed to balance tools and tool holders for machine tools and machining centers.

**Vertical axis hard bearing balancing machine.  
Model TB7**

Our TB 7 Balancing Machine has been designed for the specific balancing needs, of high speed tools and toolholders.

It is designed to allow you to perform balancing tasks for a single plane (static balancing), or in a two planes (dynamic balancing). Available different programs for corrections.

The machine is designed to work with different types of toolholders, and is equipped with a systems that allows it to perform as a normal pneumatic locking/unlocking system. This system makes it easier and more precise, balancing the tool, as it be used in your CNC machine, Our electronic eccentricity compensation software, eliminates any residual eccentricity and unbalance errors, caused by the adaptor.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
