BALANCING MACHINE FOR SMALL ROTORS - MODEL ZBTO2

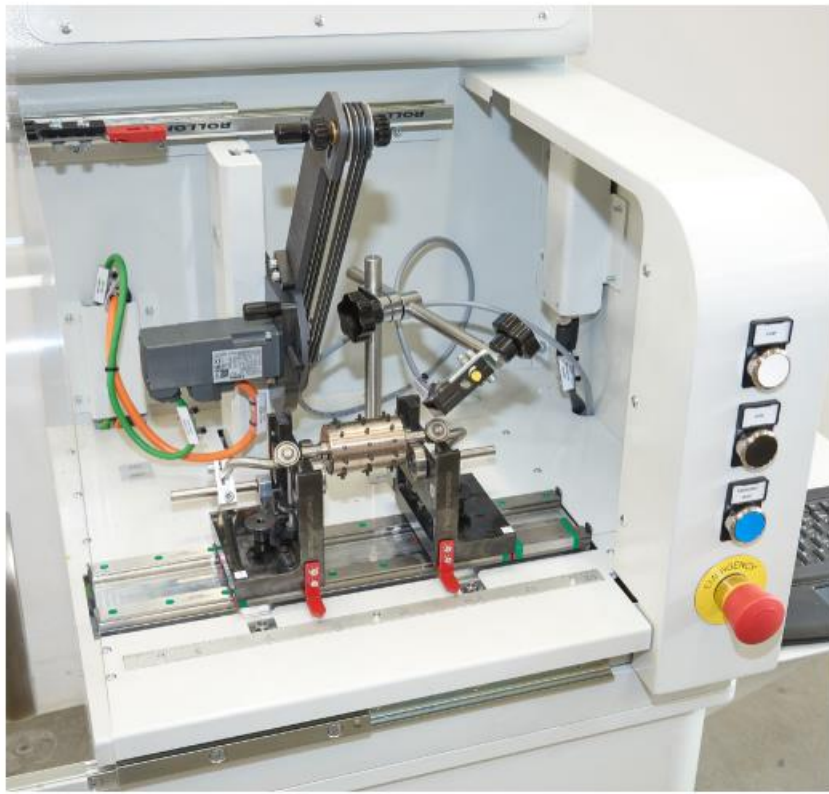

GENERAL DESCRIPTION:

Balancing machine with belt drive for balancing of rotors with weight up to 5 Kg.

The special design of the driving system enables the machine to be operated with the belt placed on top of the rotor. The machine base has got an articulated arm supporting the photocell (or a magnetic transducer) for the detection of the reference mark on the rotor (reflective tape or felt pen sign) for the unbalance angular position and for the automatic synchronizing of the signal filtering.

The machine base can be simply rested on a working bench or installed on a solid base element.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
