LOSMA PRESENTS ARGOS PRO: CARTRIDGE FILTERING UNIT FOR MISTS, VAPOURS AND FUMES

LOSMA, the leading company in the design and construction of filtration systems for air and liquids for the mechanics industry and machine tools, presents **Argos Pro** the new cartridge filtering unit for mists, vapours and fumes.

Argos Pro offers particular features, such as its innovative filter protections, that allow for greater performance and lower consumption and prevent internal drips. This increases the life of the filters themselves, maintaining a greater uniformity of the flow at the filter inlet. Furthermore the innovative design reduces the noise and ensures exceptional firmness, especially in the transport and handling phases.

Argos Pro is available in **7 versions**, with flow rates from **3,000 to 15,000 m³/h** and with different combinations of increasing filtration efficiency, up to an efficiency of 99.97%. The Argos Pro filter unit is equipped with a **pressure gauge** to display clogging of the filter elements. It can be equipped upon request with a **digital display** for viewing the main functions and the exclusive "**LED Up**" system which can indicate the clogging status of the filter elements via three different colours. Moreover always upon request it can be equipped with **Filter Hepa H13 and its H13 clogging sensor**, to obtain a very high filtration level particularly suitable for micro mists and smokes.

Filter removal is easy, immediate and clean, since the two filtration system chambers are separated by a sheet metal panel, which is also a support for the filtering elements themselves.

The re-condensed oil mists are collected in a large tank equipped with an external visual level and (upon request) a pump for automatic liquid emptying.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
