## **IMPROVING SAFETY AND ERGONOMICS OF THE WORKERS OF ONE OF THE MAJOR ALUMINIUM PRODUCERS AND RECYCLERS IN INDIA - SCAGLIA INDEVA AND ERGO HANDLERS INDIA PROJECT**

Scaglia Indeva and their Indian distributor Ergo Handlers recently worked on a project that is about to significantly improve the working conditions, safety and ergonomics of the workers of one of the major aluminium producers and recyclers in India. In particular, the company produces aluminium billets that must be placed on the platform of the pressing machine. The billets are not only heavy, weighing up to 90kg, but they are also big and extremely difficult to handle. These operations were time consuming and represented a hazard to the safety on the workplace. Of the various options, the [Indeva® Liftronic® Easy](#) manipulator was the only balancer that could fully meet their need for improved safety and ergonomics while increasing productivity. In fact, an electronically controlled Indeva® Liftronic® Easy has [advantages](#) in terms of speed and intuitive handling that other manipulators on the market cannot provide.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
