### **A NEW FRONTIER IN OPTICAL MEASUREMENT: WELCOME Metrios 332!**

#### **Measuring parts directly on the shop floor with Metrios.**

In the world of machining, every detail counts. Having **reliable and accurate instruments** in your production process is essential to **ensure the quality of your finished products**.

In response to this need, Metrios measuring systems were born.

The Metrios range offers a wide choice of models and degrees of accuracy, making it the perfect measurement solution for all types of components: from **automotive, aerospace and medical** to **semiconductors and microcomponents**. With Metrios, it is possible to check dozens of dimensions in a matter of seconds with a single program, both single-piece and multi-pieces.

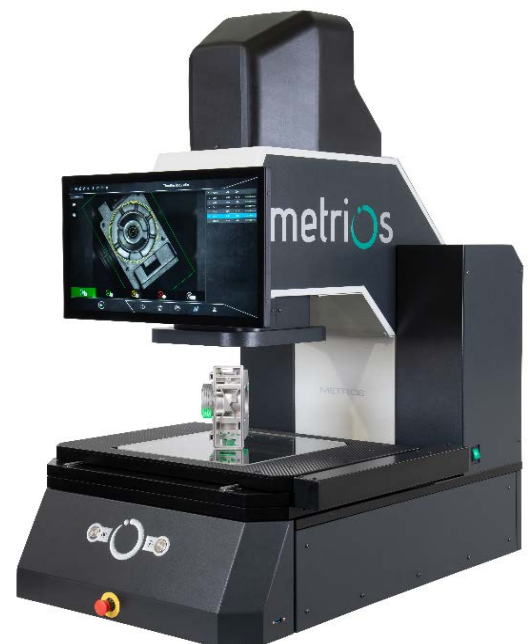

#### **Do you know how Metrios 332 works?**

The new **Metrios 332** optical measuring machine was born from the need to meet the demand of all component manufacturers who do not want to give up the **precision guaranteed by multi-sensor machines**, but who at the same time seek the **speed and simplicity** that only **modern measuring systems** can offer.

Metrios 332 represents the perfect synthesis of all these features, combining **ease of use, speed, completeness, and precision** in a single compact and powerful solution built for operating on the shop floor.

**Metrios 332 measurement system** represents a breakthrough in the metrology industry, thanks to its ability to **combine the simplicity and speed of automatic optical measurement, with the completeness and accuracy of multi-sensor machines** directly in the production environment. It is, therefore, an indispensable tool for workshops and manufacturers who want to maintain high quality standards and be always competitive in the market.

#### **Why choosing a Metrios measuring machine?**

Metrios optical measuring machines represent the evolution of manual measuring systems and guarantee the user an important reduction in costs and material waste.

Investing in an optical measuring machine enables all companies to optimize productivity and assures manufacturers the best profits from reduced waste.

The project Piattaforma India has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST – Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance:
